INTEGRATED SOLUTIONS AT AEI FABRICATION

At AEI Fabrication, we do more than just produce precision metal parts – we offer comprehensive integration solutions that take your project from start to finish. Our prowess extends beyond expert manufacturing to encompass a suite of integration services tailored to meet the diverse needs of our clients.

Systems Integration: Our team adeptly combines various components into a cohesive, functioning system, ensuring seamless operation and functionality.

Firmware & O/S Installation: Our technicians are skilled in embedding the latest firmware and operating systems, guaranteeing optimal performance and up-to-date functionalities for your key peripheral devices. We rigorously test electronics and software to ensure reliability, compliance, and maximum uptime in high-traffic gaming and kiosk environments.

Turn-Key Assembly: We provide complete assembly services, taking your existing designs and transforming them into fully realized, ready-to-use products, streamlining the process for our clients.

Retail Packaging for Distribution: We not only ensure your product functions impeccably but also ensure it's attractively packaged, ready for retail distribution, capturing the essence of your brand and resonating with your target audience.

Custom Crating: Our custom crating solutions are designed to protect and secure your products during transportation, ensuring they arrive in pristine condition, regardless of the distance or location.

Logistics Services: With our comprehensive logistics services, we manage the intricate details of shipping and distribution, ensuring timely and efficient delivery to your desired destinations.

KIOSKS | INTERACTIVE DISPLAYS & MORE

In today's engagement-driven market, AEI Fabrication powers immersive customer experiences in gaming, amusement, and kiosk markets delivering rugged, high-performance solutions engineered for nonstop operation with our production of top-quality Kiosks and Interactive Displays. Specializing in engineering for manufacturability, we expertly transform your designs into functional, user-friendly units that captivate and engage your audience effectively.

Our skill lies in realizing your vision, producing Kiosks and Interactive Displays that are essential tools for showcasing your products, services, and digital content. Perfectly suited for retail spaces, informational points, or entertainment venues, creating immersive experiences that significantly elevates your brand's presence.

Opting for AEI Fabrication means benefiting from our meticulous engineering for manufacturability, ensuring each unit is robust, functional, and produced to spec. Our dedication to manufacturability ensures we deliver top-quality, dependable solutions, perfectly aligned with your needs.

From casino floors to amusement venues, our kiosks and EGM housings are built for durability, engagement, and scalability.

INVENTORY MANAGEMENT

TURN-KEY COMPONENT PROCUREMENT

Once a build order is released, AEI manages full component procurement — including customer-supplied material — under a centralized, ISO-controlled system. We receive, inspect, barcode, and securely store all parts in a controlled environment designed for high-volume kiosk and gaming programs. Every component is tracked from dock to deployment.

REAL-TIME INVENTORY VISIBILITY

Our system provides live tracking of on-hand stock, usage rates, reorder points, and project-specific allocation — enabling uninterrupted multi-site deployment and minimizing downtime risks.

SERIALIZED TRACEABILITY

Each assembly is fully serialized and mapped to its hardware revisions, sub-assemblies, and supplier sources. In the event of a field issue, we can instantly trace the exact build and supplier to accelerate root-cause analysis and corrective action. This prevents mixed builds and supports clean revision control.

POST-DEPLOYMENT SUPPORT

AEI maintains field-ready inventory for service kits, replacements, and future production. Orders are kitted and shipped directly to casinos, distribution centers, or service teams to reduce lead times and protect field uptime.

END-TO-END SUPPLY CHAIN EXECUTION

By consolidating procurement, storage, tracking, and fulfillment under one ISO-certified operation, AEI protects your launch schedules, version control, and uptime — ensuring every deployment succeeds.

ENGINEERING FOR MANUFACTURABILITY

Our engineering team focuses on design for manufacturing. We optimize parts and components in a way that simplifies the production process. This helps you get your best end product and saves you money.

With friendly engineering staff we work hand-in hand with you to take your project or product from concept through development to completion. Our decades of experience in creating products for complex environments and demanding industries enables us to perform at a very high, professional level regardless of the project or size. For kiosk and gaming OEMs, this means faster speed-to-market and lower total cost of ownership..

Simply put, we are the best in the industry at listening to and working with you to develop the perfect fabrication solution for your product or project that exceeds expectations and utilizes all cost-efficiencies. When it comes to product development, consider our AEI Fabrication Engineering team your team.
